

288-core optical distribution box traditional

Overview

This ftth fiber distribution box supports up to 288 fiber cores and accommodates 24 pcs 12-core splice trays, enabling high-density fiber splicing and organized cable routing for scalable network expansion. Fiber optic cross connect cabinet is an outdoor optical equipment that is especially designed for outdoor optical nodes in access network. Galvanized steel enclosure supports splicing, splitting, and patching, with OEM/ODM customization for telecom and fiber infrastructure projects. generally the OCC/ODC/FDT consists of several part, like integrated splicing unit, PLC. A fiber distribution cabinet (FDC) is an enclosure used to house and manage fiber optic cables and related equipment. FDCs are typically installed in outdoor settings, such as on the side of a building or in an underground vault, and are used to distribute fiber optic cables to multiple buildings. Datacom Indoor Wall-Mount Fiber distribution enclosure (WODF) is designed for managing high-density fibre splicing in Building Entrance and Floor Telecom facilitates fulfilling FTTH requirements.
