

5 circuit breaker distribution boxes

AI Overview

A 5-circuit breaker distribution box safely distributes electrical power to multiple circuits, protecting each with individual breakers and offering convenient monitoring and installation.

Overview

A distribution box (DB box) is an enclosure that distributes electrical power from a single input source to multiple circuits, ensuring safety and organization in homes, workshops, offices, or industrial settings . A 5-way distribution box is designed to accommodate five individual circuit breakers, allowing separate protection for different areas or equipment .

Key Features

- **Material:** Typically made from high-quality PC or ABS plastic, sometimes reinforced with metal, providing durability, flame retardancy, and corrosion resistance .
- **Protection Rating:** Many 5-way boxes have an IP65 rating, making them waterproof and suitable for both indoor and outdoor use .
- **Transparent Cover:** A clear flip cover allows easy monitoring of breaker status without opening the box, enhancing safety and convenience .
- **Mounting:** Internal rails or DIN rails simplify installation of circuit breakers, and pre-set wiring holes allow flexible connections from any direction .
- **Indicators:** Some models include neon lights or status indicators to show power availability .

Applications
