

72-core optical cable grouping

Overview

72 core fiber optic cable should be selected by fiber standard, cable structure, jacket, tensile strength, installation route, drum length, testing, and quantity. Buyers should confirm whether the route is aerial, duct, or direct burial before quotation. We supply single mode GYTS fiber optical cable and multimode GYTS fiber optical cable, fiber strand from 2 cores to 432 cores. A related GYTA type cable is available. GYTS is used for duct or aerial applications. These steel tape armored cables are suitable for installation for long haul communication and LANs, especially suitable for the situation of high requirements of moisture resistance. 9mm with 72 fibers (6t x 12f) SM OS2 G.
