

72-core optical distribution box

Overview

SJ-ODB-M03 fibre distribution box 72 cores is the best of way to manage and organize your fiber optic cables and protect the fiber optic splice locations. It requires no tools for assembly, making it easy to move your equipment as needed. Fiber Management Tray also called ODF Distribution Box, Integrated Splicing and Distribution ODF. It supports splicing and patching capabilities with high connector density, providing flexible solutions for various access network applications. It integrates splicing, signal splitting, storage and cable distribution function within a single enclosure for outdoor. This 72 core inline fiber splice closure can be used as fiber optic distribution box that designed for optical splitting, fiber splicing, cable joint, termination and distribution.
