

Argentina imported optical-electric hybrid cable OSFP

AI Overview

High-speed OSFP-compatible optical-electric hybrid cables are available in Argentina through specialized distributors like Horizon, supporting data rates up to 1.6Tbps with both passive and active configurations.

OSFP Cable Overview

OSFP (Octal Small Form Factor Pluggable) cables are designed for high-density, high-speed data center applications, supporting aggregate data rates from 200Gbps up to 1.6Tbps. They accommodate signaling protocols including 28G NRZ, 56G PAM4, 112G PAM4, and 224G PAM4, and are available in passive and active variants. These cables can be used in direct-attach, active electrical, or optical configurations, providing flexibility for chip-to-chip, board-to-board, or rack-to-rack interconnects (TE Connectivity, Molex, Amphenol) .

Hybrid Optical-Electric Cables in Argentina

In Argentina, companies like Horizon specialize in hybrid optical/electric cables, which integrate data transmission and Power over Ethernet (PoE) capabilities. These cables are suitable for telecommunications and high-speed networking applications, and can be imported or distributed locally for deployment in data centers or enterprise networks . Hybrid cables combine fiber-optic cores for high-speed data with electrical conductors for power or signaling, reducing cabling complexity and improving installation efficiency.
