

Bridge Structure Singapore Lights

Overview

Explore the iconic Helix Bridge Singapore, a marvel that lights up Marina Bay with its unique spiral design. Picture yourself walking across this stunning bridge at night, the lights reflecting off the water with a breathtaking Helix Bridge Singapore skyline view. Its commission was the result of a selected 36-entry international design competition held in 2006. ColorBurst Powercore lights were used exclusively on the Elgin Bridge to bring out the grandeur of the tall pillars, while a mix of ColorGraze Powercore, iColor Flex MX gen2, Vaya Flood HP were used in the lighting of the other four iconic bridges. Opened in 2010, it serves as both a pedestrian walkway and a symbol of innovation, embodying Singapore's multicultural society.
