

Cable tray angle annotation

Overview

Use the Angles pane of the Electrical Settings dialog to specify the fitting angle to use when adding or modifying cable tray or conduit. rotate the fitting 180 degrees (flip the fitting) rotate the fitting 90 degrees rotate the fitting to an angle you specify then. while pressing Ctrl, click the Rotate grip (). Cable tray angle bends are represented by symbols. You can find which symbol is used for a particular delivered. Specification editor now checks that angle to which the functional description is intended for is implemented by the parts that are added to these functional descriptions. Note: If you need for example. OpenPlant Orthographics Manager provides a separate annotation option for HVAC and Cable Tray Components. This page lets you define Label and Leader line options.
