

Cable tray support fabrication unit price

AI Overview

The cost of cable tray supports varies widely, typically ranging from \$5 to \$100 per meter depending on material, type, and installation complexity.

Material and Tray Type Impact

The material of the cable tray is a primary cost driver. Common options include:

- **Steel (Pre-Galvanized or Hot-Dip Galvanized):** Pre-galvanized steel is the most affordable, suitable for dry indoor areas, while hot-dip galvanized steel is more expensive but ideal for outdoor or industrial environments due to corrosion resistance. Steel trays generally cost \$5–\$25 per meter.
 - **Aluminum:** Lightweight and corrosion-resistant, aluminum trays are more expensive, typically \$6–\$30 per meter, but reduce the need for heavy supports.
 - **Stainless Steel:** Highly durable and corrosion-resistant, used in harsh or hygienic environments, costing \$20–\$100 per meter.
 - **Fiberglass (FRP):** Resistant to chemicals and moisture, priced \$10–\$50 per meter, suitable for aggressive environments.
- Tray type also affects cost:
- **Ladder trays:** Open design, supports heavy cables, slightly higher cost.
 - **Wire mesh or perforated trays:** Cheaper, ideal for lighter cables and flexible installations.

Support Fabrication and Installation Costs

Cable trays require supports, brackets, and hangers to hold them in place. The fabrication and installation costs depend on:
