

Central Asian Steel Cable Tray Specifications and Prices

AI Overview

Steel cable tray prices in Central Asia vary widely, typically ranging from \$0.40 to \$1.50 per meter depending on material, customization, and supplier.

Price Range and Suppliers

In Central Asia, basic galvanized steel trays are generally the most cost-effective, while stainless steel, aluminum, and fiberglass-reinforced plastic (FRP) trays command higher prices due to corrosion resistance and specialized applications. For budget-sensitive industrial projects, suppliers like Zhonghe Steel (Tianjin) Co., Ltd. offer unit costs as low as \$0.40 per meter at high volumes, whereas Guangdong Yuchang Technology Co., Ltd. provides customizable trays starting around \$0.90 per meter. Plastic optic fiber trays for sensitive IT environments can cost approximately \$1 per meter.

Factors Affecting Pricing

- **Material Type:** Galvanized steel is cheaper than stainless steel or aluminum; FRP is used for corrosive or hazardous environments.
- **Customization:** OEM or factory-direct options can influence cost, especially for specialized dimensions or load capacities.
- **Volume and Procurement:** Bulk orders often receive discounts, while small orders may incur higher per-meter costs.
- **Regional Logistics:** Importing trays can increase costs due to shipping and customs, whereas local manufacturers may offer competitive pricing and faster delivery.
