

China Unicom is laying outdoor fiber optic cables

Overview

China Unicom Group, one of China's major telecommunications operators, has revealed plans for the construction of a nearly 3,000-kilometer-long submarine optical fiber cable, which will span from Hong Kong to Sihanoukville in southern Cambodia. Recently, the first new global carrier “Large Effective Area Fiber” (LEAF) (ITU-T standard code G. HK, hereinafter. Though most people will never see any of the submarine cables that are buried deep in the seabed, they impact many aspects of our daily lives, such as network access as well as internet speeds and costs. Surging optical fiber. iples of moderate advancement, scientific planning, and coordinated development. It accelerates the construction of network infrastructure and actively plans computing power , enhanced the breadth and depth of mobile network coverage and user perception. Broadband network capability contin nce 5G. Additionally, they kicked off the world's first demonstration project of a hollow-core fibre cable transmission system on an existing network, featuring a single-wavelength rate of 1. 2 Tbit/s and a one-way transmission rate exceeding 100 Tbit/s.
