

Cost of enclosed cable trays

AI Overview

Enclosed cable trays typically cost between \$10 and \$25 per meter, depending on material, size, and installation requirements.

Pricing Overview

Enclosed cable trays are designed to fully protect electrical cables from physical damage, dust, water, and accidental contact, making them ideal for industrial, commercial, and residential applications . The cost of supplying these trays depends on several factors:

- **Material:** Galvanized steel is common and balances durability with cost, stainless steel is more expensive but corrosion-resistant, and aluminum is lightweight but pricier than steel .
- **Tray Type:** Enclosed trays are generally more expensive than open ladder or wire mesh trays due to their protective design and heavier construction .
- **Size and Load Capacity:** Larger trays or those designed to carry heavy power cables cost more, while smaller trays for light cabling are cheaper .
- **Installation and Labor:** Enclosed trays simplify cable management and reduce maintenance, but installation may require more fittings and supports, which can increase labor costs .
- **Shipping and Bulk Orders:** Costs can be reduced by ordering in bulk and consolidating shipments, especially for large projects .
