

Current Status of Optical Cable Lines in Iraq

Overview

The Iraqi Ministry of Communications is intensifying efforts to modernize the country's digital infrastructure through two major initiatives: the expansion of the national fiber-optic network and the launch of a new international submarine cable link. A new sixth-generation fibre optic cable production line has been installed at Diyala General Company [Diyala State Company], a subsidiary of the Ministry of Industry and Minerals, with a design capacity of 15,000 kilometres per year. On August 27, Minister of Communications Dr. Together, these initiatives—domestic fiber expansion and international submarine connectivity—reflect the ministry's commitment to advancing Iraq's digital transformation, strengthening infrastructure, and integrating the country more deeply into global communications networks. Sanad's remarks took place during his participation in the third Iraq Telecoms Summit held. Contracts have been signed to land two submarine cables in Iraq. Details about the cable – its name, its other cable.
