

DNC Optical Fiber Module

AI Overview

DNC Optical Fiber Modules are versatile fiber connectivity solutions designed for data centers, enterprise networks, and telecom installations, supporting high-density, multi-fiber connections with MPO/MTP, LC, SC, and other interfaces.

Overview

DNC Optical Fiber Modules are part of a broad range of fiber optic products offered by DNC Technosolutions Pvt. Ltd., including patch cords, pigtails, connectors, adapters, couplers, splitters, patch panels, and media converters . These modules are engineered to provide high transmission efficiency, durability, and enhanced insulation, making them suitable for both indoor and outdoor applications .

Types and Features

- **MPO/MTP Modules:** Multi-fiber trunk cables terminated with MPO/MTP connectors, ideal for data center interconnects and high-bandwidth applications. They support tool-less installation and can connect cassettes, panels, or fan-out systems .
- **Patch Panels and Rack-Mount Modules:** DNC offers sliding and fixed rack-mount fiber patch panels that organize and distribute optical cables, allowing easy termination, splicing, and maintenance. Sliding panels provide a 45-degree working angle for convenient access .
- **Fiber Splitter Modules:** Passive optical devices such as 1x2, 1x8, and 1x32 PLC splitters with SC, LC, ST, or FC connectors, used in Passive Optical Networks (PON) for distributing signals to multiple endpoints .
- **Media Converters and SFP Modules:** Convert data signals from copper to fiber or video/telephone to fiber, supporting flexible network integration .
