

Distribution Box APNX

AI Overview

The APNX V2 is a premium PC case designed for optimal cooling, modular airflow, and high-end component distribution, complemented by APNX FP3 fans and Max G1 power supplies.

Overview of APNX V2

The APNX V2 is a high-performance PC case aimed at enthusiasts, gamers, and modders. It features a spacious interior with separate GPU and PSU airflow paths, ensuring efficient cooling for high-end components . The case supports up to 10x 120mm fans or dual radiators, and comes with three removable tempered glass panels for a clear view of the build . Its innovative X-Pand Flow design allows flexible radiator placement beyond standard configurations, enhancing thermal performance .

Cooling and Fans

APNX offers a range of high-performance fans compatible with the V2, including the FP3 series. These fans are pre-installed in the V2, typically four 140mm ARGB fans, and are designed for quiet operation with high airflow . The fans feature PWM and ARGB hubs, allowing centralized control of speed and lighting, which improves both aesthetics and thermal management . Other fan models like FP1 and FP2 provide additional options for custom builds, with enhanced blade design and ARGB lighting for visual appeal .
