

Do you need qualifications to sell optical cables

Overview

Skills-based certifications require a CFOT or CPCT as a prerequisite for both classes at a FOA-Approved school or application for direct certification (Work-To-Cert). A technician who needs to terminate connectors might end up sitting through a design-heavy certification course, while an engineer responsible for network architecture could be enrolled in hands-on splicing classes they will never apply. In order to sell telecom cable online, the first and basic step is to understand the market and the target audience.)?

Do the customers need a simplex or a duplex?

Can you sell fiber optic cable in a. Broadband Fiber Installers are expected to know the primary comprehension of Passive Optical Networks (PON) and of Optical Time Domain Reflectometer (OTDR) use. This requires an in-depth understanding of the telecommunications industry and the benefits and applications of fiber optic technology. Every marketplace has its pros/cons and is suitable for different businesses.
