

Does Cambodia have international fiber optic cables

AI Overview

Cambodia has a growing and robust fibre optic network, with multiple providers offering nationwide coverage and high-speed connectivity for both businesses and homes.

Major Fibre Optic Providers

Telcotech operates one of the most extensive underground fibre networks in Cambodia, spanning over 11,000 km nationwide. It provides full redundancy and 99.99% service availability, connecting to international Tier-1 networks in Hong Kong, Malaysia, and Singapore. Telcotech is a member of the Asia-America Gateway (AAG) and the Malaysia-Cambodia-Thailand (MCT) submarine cable systems, ensuring high-bandwidth international connectivity . SINET offers dedicated fibre connections directly from its distribution nodes, providing 100% dedicated bandwidth up to 1 Gbps. Their service is designed for consistent speed and stability, making it suitable for businesses that require reliable data transfer and high-volume uploads and downloads . CityLink provides high-speed internet with fibre optic technology, offering speeds up to 1 Gbps and 99.9% uptime. They serve both residential and business customers, with professional installation and 24/7 customer support. CityLink emphasizes low latency and secure connections, making it ideal for gaming, streaming, and business operations . Angkor Data Infrastructure, licensed by the Telecommunication Regulator of Cambodia (TRC), offers nationwide fibre optic services including planning, implementation, leasing, and maintenance. They focus on building a digital nation by connecting citizens and businesses through a comprehensive fibre broadband network .
