

Dual-core male connector for use in island environments

Overview

With 20 pins in a durable housing, this DTB male connector supports large, sealed wiring harnesses in complex marine installations. They are designed for heavy duty use in the most rigorous underwater applications on the planet. The design offers a high integrity sealing arrangement, metal. The HYSF SFCOEBH2M is a rugged high current 2-core male bulkhead watertight connector with 5/8 thread, optimised for secure panel-mount through-hull installations in high-power marine applications. - ANCOR Marine Grade lugs are manufactured from heavy duty annealed tinned copper, providing for maximum current flow. - 100% tin plated copper resists corrosion. Glenair's Series 22 Geo-Marine® Connectors offer high-density insert arrangements for a variety of oceanographic, geophysical and other severe environmental applications. The mated stainless steel plug and receptacle have a hydrostatic pressure sealing capability of up to 5000 psi (345 bar) and are.
