

European Switch Industrial Series

AI Overview

Euroswitch Industrial Series offers a wide range of highly reliable, certified switches and sensors for hazardous and industrial environments.

Overview

Euroswitch specializes in industrial and process automation instrumentation, providing switches and sensors designed for harsh and hazardous environments such as oil and gas, power generation, nuclear, military, and rail industries . Their products are globally certified for safety and reliability, including ATEX, IECEx, UL/CSA, TRCU, INMETRO, and other regional standards . The series includes proximity switches, limit switches, valve monitoring systems, flow switches, vibration sensors, level switches, and pressure switches .

Key Product Series

- FS Series: Cylindrical non-contact proximity/limit switches using internal magnet technology, capable of sensing ferrous materials up to 2.5mm, with options for dry contact SPCO/SPDT, DPCO/DPDT, or 2-wire NAMUR outputs .
- ES Series: Hermetically sealed proximity switches requiring a magnetic actuator, offering sensing ranges up to 125mm and multiple contact forms including latching and NAMUR types .
- RS Series (RS-V3): Rectangular, hermetically sealed limit switches with volt-free dry contacts, robust resin housing, and suitability for SIL 2/3 safety-related systems. These switches are designed for arduous environments and meet IEC 61508:2010 standards .
