

FC fiber optic attenuator price

AI Overview

FC fiber optic attenuators typically range from \$5 to \$50 depending on type, attenuation level, and supplier.

Pricing Overview

The cost of an FC fiber optic attenuator depends on several factors including attenuation value (dB), singlemode or multimode, fixed or variable type, and inline or build-out style. For example:

- DigiKey offers a wide selection of fiber optic attenuators, including FC connectors, with prices starting around \$5–\$10 for basic fixed attenuators and increasing for higher precision or variable types .
- Thorlabs provides singlemode FC/PC or FC/APC fixed attenuators, typically in the \$20–\$50 range, depending on the attenuation level and wavelength specifications .
- FS.com lists fixed and variable attenuators with attenuation ranges from 0 to 60 dB, with prices generally starting around \$10–\$15 for standard singlemode FC attenuators .
- Farnell UK and MCL Data Solutions also offer FC attenuators, with inline or build-out styles, and prices can vary from £5–£40 (~\$6–\$50 USD) depending on the configuration and supplier discounts .

Factors Affecting Price

- Attenuation Level: Higher dB values or precise tolerances usually cost more.
- Fiber Type: Singlemode attenuators are generally more expensive than multimode.
