

Fiber Optic Cable Reel Composition

Overview

The fiber optic cable reel is made of ABS and PC material, which is ideal for using in communication, broadcast and pro audio applications. It is used with industrial jumpers, network cables, audio and video cables, and offers significant cost savings through direct cable integration into reel. OCC's Modular Advanced Reel System (MARS ®), the industry's first lightweight cable deployment reel system, is designed specifically for the demanding needs of harsh-environment fiber optic installations. Unlike traditional metal-style reels, MARS is a lightweight, modular system constructed of an. The FCR-1000 series cable reels are designed to fit Princetel's standard FORJs and slip rings. The rotary joints are protected inside the drum for durability and seamless deployment of single or multi-channel fiber optic and/or electrical cable with uninterrupted optical and/or electrical signal. This packaging solution provides features that enable our customers greater efficiencies than before.
