

Fiber optic SC to patch cable

AI Overview

A fiber optic patch cable is a type of fiber optic cable that has connectors on both ends, designed for flexible, short-distance connections within networks. They are also known as fiber jumpers and are used to connect various optical devices such as transceivers, switches, and patch panels . These cables transmit light signals instead of electrical signals, allowing for high-speed data transfer with reduced latency and the ability to handle heavy data loads . Fiber patch cables are essential for efficient network performance and are available in various types and configurations to suit different applications .
