

Fiber optic cable cannot be passed through the duct

Overview

Fiber optic cable must be protected in intermediate manholes. Based upon the cable route survey and the equipment/ manpower resources available . ing and blowing a cable in a duct and the impact on the cable designs. To ensure all specifications are met, consult the specific cable specification sheet for the cable you. Fiber optic cable now forms the main network backbone of most telecommunication systems because of its efficiency in transmitting massive data within a short time. However, it is imperative to install fiber cable adequately for it to work optimally as expected. An important decision-making factor. I just got fibre internet installed but unfortunately there's no way I can get the router to my main floor except passing the optical cable through (at most) a foot of of duct work (100 year old home). Is it best to leave it there or would it be more helpful if I used the old cable to pull in a length of thin rope or thick string?

Re: Fibre through existing domestic cable duct?

Openreach cannot use another providers duct even if. Duct fiber optic cables—often called “duct fiber”—are specialized optical cables engineered to be installed within pre-existing ducts (hollow tubes) rather than buried directly in soil or strung from poles.
