

Fiberglass cable tray ratio

Overview

Fill ratio — IEC 61537 and NEC Article 392 both cap power cables at 40–50 % of the tray cross-section. Not all cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to the enclosure. Maintain spacing or to keep cables in place when the tray is erect the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is intended for instrumentation and control applications that require. Properly sizing your cable tray is critical for safety and compliance. Our free calculator helps you determine the correct tray size based on NEC and IEC standards. When possible, the splice should be located at quarter span.
