

Finished Cable Tray Supports

Overview

These tray systems allow excellent ventilation and prevent sagging while routing. Is your cable tray system optimized for safety, dependability, space and cost savings?

Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. OBO BETTERMANN has offered products and solutions for electrical installation for over 100 years. Our focus has always been on solutions from the field of cable support systems. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. The Cable Tray design standards, performance standards, test standards and application in this document have been tested extensively by competent professional engineers and completely installed, without damage either to conductors or insulation. TechLine Mfg. offers various supports for its cable tray products including hangers, brackets and clamps. Supports should be located so that conductors are supported at regular intervals.
