

French Aggregation Switch 100G

Overview

Enterprise SONiC based 32 port 100G QSFP28 aggregation core switch for aggregation spine architecture, which line rate L2 L3 up to 3.2Tbps, Marvell Falcon, ROCEv2 EVPN Multi homing supported. In data-intensive, distributed campus networks, the LANCOM YS-7154CF ensures the necessary performance and high availability of network resources. 6. FS 100G Ethernet Switches with high speed and port density give you cost-effective options to incrementally upgrade and have flexible bandwidth across the existing infrastructure in enterprise campus network. Requires a 4-post rack, or a center-mount bracket or cantilever shelf on 2-post racks for optimal support. It is ideal for low latency, high bandwidth, and scalability environments, such as cloud computing, GPU interconnects in. MES7048 switches are high performance devices with 10GBASE-R, 40GBASE-SR4/LR4 and 100GBASE-SR4/LR4 interfaces that can be used as aggregation or transport switches in carrier networks and as Top-of-Rack or End-of-Row switches for data centers. The device's ports support operation at rates of 1 Gbps.
