

Haiti Cabinet Cold Aisle Intelligent Type

AI Overview

The Haiti Cabinet Cold Aisle Intelligent Type is a modular cold aisle containment system designed to optimize airflow, improve cooling efficiency, and support intelligent monitoring for high-density data center environments.

Overview

Cold aisle containment systems, like the Haiti Cabinet Intelligent Type, separate cold supply air from hot exhaust air in data centers, preventing mixing and improving cooling efficiency. By isolating the cold aisle, these systems allow computer room air conditioner (CRAC) units to operate more effectively, increasing temperature differentials and reducing energy costs by 20-50% when properly installed .

Key Features

- **Modular Design:** Components are modular and snap together, allowing for quick deployment, future expansion, and adaptation to site-specific layouts .
- **Intelligent Airflow Control:** The system can integrate with EC fans and monitoring systems to adjust airflow in real-time based on IT load, ensuring optimal cooling and energy efficiency .
- **Flexible Installation:** Panels can be attached horizontally or vertically to cabinet tops, forming a roof for cold air supply or extending to overhead return plenums .
- **Fire Safety:** Drop-away or fall-away panels allow sprinkler systems to operate without obstruction, maintaining safety while preserving containment integrity .
- **High Efficiency:** Airflow integrity is typically above 97%, minimizing bypass and recirculation, which reduces thermal alarms and equipment shutdowns .
