

High polymer alloy cable trays available in stock

AI Overview

Macromolecule alloy (high polymer) cable trays are available, offering fire resistance, corrosion resistance, lightweight design, and long service life.

High polymer alloy cable trays, also known as macromolecule alloy cable trays, are designed to replace traditional steel or PVC trays in electrical installations. They combine the physical and chemical advantages of plastics with enhanced features such as fire resistance, acid and alkali resistance, insulation, anti-aging, and corrosion resistance. These trays are lightweight, environmentally friendly, and energy-efficient, making them suitable for industrial, commercial, and infrastructure projects.

Key Features

- **Standards Compliance:** Produced according to UL568 standards and certified by the National Fire Protection Building Materials Quality Supervision and Inspection and China Quality Certification Center (CQC).
- **Durability:** Resistant to fire, chemicals, and aging, ensuring a long service life.
- **Lightweight and Easy to Install:** Simplifies handling and reduces installation time compared to metal trays.
- **Customizable:** Can be manufactured to meet specific project requirements and special designs.
- **Eco-Friendly:** Recyclable and energy-saving, supporting sustainable construction practices.
