

High-precision aluminum alloy cable tray

Overview

Our Aluminum Alloy Cable Tray is engineered for superior performance in modern cable management systems. By utilizing a high-strength aluminum-magnesium-silicon alloy, we achieve an excellent strength-to-weight ratio, making installation faster and reducing structural load. Aluminum Cable Tray systems are lighter than steel cable tray and Certified CSA Cable Tray, UL listed, NEMA and certified. With easy installation and strong corrosion resistance, it is ideal for both indoor and outdoor applications. Thanks. ECTRAY offer a wide range of perforated cable trays which are fabricated using quality raw material such as Zinc Aluminum Magnesium (ZAM). This article explores the design, benefits, installation practices, and real-world applications of aluminum alloy cable. For cable tray applications lacking sufficient space for the number of supports required for standard-length sections, choose T&B Cable Tray long-span AH1-8 series aluminum cable tray in 40-foot (12).
