

Home electrical distribution box cost

AI Overview

Residential electrical distribution boxes typically range from £30 to £200, depending on capacity, features, and brand.

Price Range and Options

For standard single-phase residential distribution boxes, prices generally start around £30-£50 for basic models with a few circuits and minimal features, as seen on eBay UK . More advanced units with higher amperage ratings, multiple circuits, or integrated safety features can cost £100-£200 or more, available from suppliers like CEF and Amazon . Three-phase or larger-capacity boxes designed for heavier electrical loads are priced higher due to increased durability and complexity .

Factors Affecting Cost

- **Number of Circuits:** More circuits increase the size and complexity, raising the price.
- **Amperage Capacity:** Higher-rated boxes for larger homes or additional appliances cost more.
- **Material and Build Quality:** Durable, weather-resistant enclosures for outdoor installation carry a premium.
- **Integrated Features:** Smart monitoring, digital displays, and remote control capabilities add to the cost.
- **Brand and Certification:** Certified brands with compliance to electrical standards may be more expensive but ensure safety and reliability .
