

Hot-selling model of carrier-grade router for campus network use

AI Overview

Leading carrier-grade routers for campus networks include Huawei NetEngine AR series, H3C CR16000/CR19000 and S12500R series, and HPE HSR6800 series, offering high throughput, modularity, and advanced features for enterprise-scale deployments.

Huawei NetEngine AR Series

Huawei's NetEngine AR series offers modular and fixed routers designed for medium-to large-sized campus networks. Modular models support forwarding capacities up to 12 Gbps, while fixed routers handle up to 2 Gbps. These routers integrate routing, switching, security, wireless, and 5G/LTE functions, with flexible card slots for service expansion, making them suitable for scalable campus deployments .

H3C CR and S12500R Series

H3C provides high-performance options for campus networks:

- CR16000-F: High-end router with distributed hardware forwarding, non-blocking switching, and support for high-density FE/GE, 10GE, 25GE, 40GE, 50GE, 100GE, and 400GE interfaces. It features virtualization, multi-core CPU support, and high availability, ideal for backbone or core campus nodes .
- CR19000: Next-generation core router for service provider-level applications, suitable for MAN core nodes or data center interconnects, with CLOS architecture and Comware V7 OS for high reliability .
