

# How many boxes are in a three-level distribution box

## Overview

Three level distribution box: a distribution box is set under the main distribution box, a switch box is set under the distribution box, and electrical equipment is set under the switch box to form a three-level distribution box. "Two level protection" mainly refers to the use of leakage protection measures. Its function is to further distribute power to smaller lines, ensuring a stable power supply to each electrical device. The use of cables allows for more flexible power transmission, enabling. The terms primary, secondary, and tertiary distribution boxes are relative. From the transformer's low-voltage side (0. The following is a detailed introduction about it: -
