

How much do pre-made cable trays cost

Overview

Budget approximately \$15-22 per foot installed for commercial applications, with industrial installations typically costing 25-40% more due to specialized requirements and enhanced durability needs. Wireways and cable trays price structures are dominated by material costs, which account for 60-70% of total project expenses. Steel wireway systems typically fall in the \$8-20 per foot range, while aluminum variants command premiums of \$12-30 per linear foot due to corrosion resistance properties. That number matters, but it's rarely the one that decides whether a project stays within budget. This guide breaks down everything buyers need to know, from price trends to cost-saving tips.
