

How much does a French metal cable tray cost

AI Overview

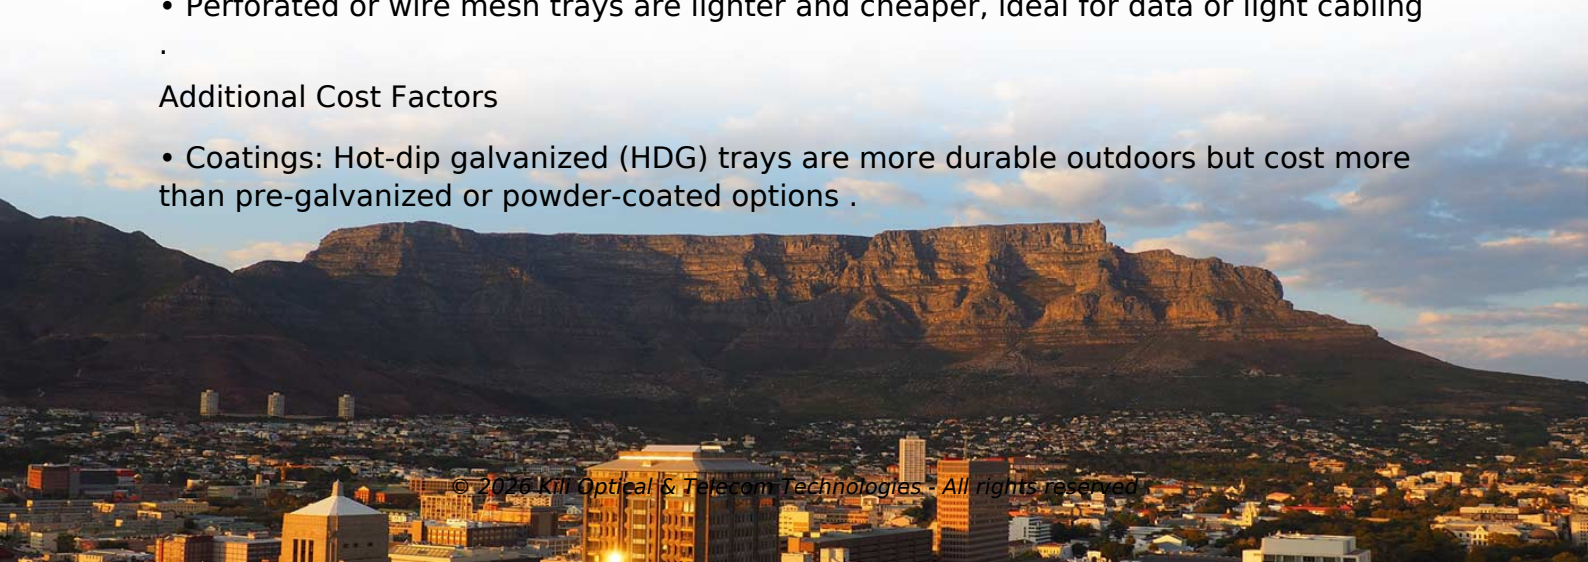

Metal cable trays in France typically cost between €10 and €50 per meter, depending on material, type, and coating.

Price Range by Material and Type

- **Galvanized Steel:** The most common and cost-effective option, suitable for indoor and moderately corrosive environments, generally priced around €10–€30 per meter depending on thickness and finish .
- **Aluminum:** Lightweight and corrosion-resistant, ideal for installations requiring less structural support, costing approximately €20–€50 per meter .
- **Stainless Steel:** Premium option for highly corrosive or hygienic environments, such as coastal areas or food processing plants, often the most expensive, exceeding €50 per meter in some cases . Tray types also affect pricing:
 - Ladder trays are more robust and suitable for heavy power cables, generally at the higher end of the price range.
 - Perforated or wire mesh trays are lighter and cheaper, ideal for data or light cabling .

Additional Cost Factors

- **Coatings:** Hot-dip galvanized (HDG) trays are more durable outdoors but cost more than pre-galvanized or powder-coated options .
