

How much does a custom-made wire mesh cable tray cost

AI Overview

Custom-made wire mesh cable trays typically cost between \$2 and \$100 per meter, depending on material, finish, size, and order quantity.

Price Ranges by Material and Finish

- **Pre-Galvanized Steel:** The most affordable option, suitable for dry indoor environments like offices or schools, generally at the lower end of the \$2-\$25 per meter range .
- **Hot-Dip Galvanized Steel (HDG):** More expensive due to thicker zinc coating, ideal for outdoor or industrial environments, offering better corrosion resistance .
- **Aluminum:** Lightweight and rust-proof, costs more than steel but reduces installation weight and support requirements .
- **Stainless Steel (304 or 316 grade):** Premium option for corrosive or hygienic environments, such as chemical plants, coastal areas, or food processing facilities, with prices ranging from \$30 to \$100 per meter for small-scale orders . Bulk orders can reduce costs significantly, sometimes to \$0.75 per meter for large industrial purchases .

Factors Affecting Cost

- **Tray Type:** Wire mesh trays are generally cheaper than ladder or perforated trays and are ideal for lightweight cabling .
- **Size and Load Capacity:** Wider or deeper trays, or those designed to carry heavier cables, increase material usage and cost .
