

How much does a low-loss U-shaped steel cable tray for edge computing cost

Overview

The average cable tray price per meter ranges from \$2 to \$25, depending on material, type, size, and surface finish. For bulk orders or project pricing, the cost can be significantly lower. The main cost driver is the material used in manufacturing: Though less rigid than metal trays, modern HDPE designs offer sufficient load-bearing capacity for most cable-support needs. Carbon steel trays are the most economical option and are typically coated with paint or zinc (via galvanization) to enhance corrosion resistance. The rungs provide support for cables and allow. To help distributors estimate load capacity and shipping costs, below is a simple U Channel Steel size and weight chart (approximate values): *Inch values are approximate references for search and procurement convenience. Actual U Channel Steel production and engineering specifications are based on. The majority of individuals will consider the cost of the components. Also known as mild steel, low-carbon steel is easy to machine, form, and weld. It can also be surface-hardened with heat treatment.
