

How much does a meter of two-core indoor optical fiber cable cost

AI Overview

The price of a two-core indoor optical fiber cable typically ranges from \$0.30 to \$1.50 per meter, depending on fiber type and specifications.

Price Range and Factors

For basic indoor applications using multi-mode fiber, the cost can be as low as \$0.30 per meter. For single-mode fiber or cables with additional protective layers, such as armored jackets or compliance with international standards (e.g., ITU-T G.652), prices can rise to \$1.20-\$1.50 per meter. Key factors influencing the cost include:

- **Fiber Type:** Single-mode fibers are more expensive due to their ability to transmit data over longer distances with minimal signal loss, while multi-mode fibers are cheaper and suitable for shorter-range indoor networks.
- **Cable Construction:** Indoor cables with extra protection, such as flame-retardant jackets or LSZH (Low Smoke Zero Halogen) materials, cost more but improve safety and durability.
- **Certifications and Standards:** Cables meeting international standards are priced higher due to reliability and performance guarantees.
- **Installation Environment:** Indoor cables are generally cheaper than outdoor or direct-burial cables, which require additional protective layers.
- **Bulk Purchasing:** Ordering large quantities (e.g., 1,000 meters or more) can reduce the effective cost per meter by 20-30%.
