

How much does fiber optic splicing cost in 2017

Overview

Fiber optic splicing costs vary widely depending on project size, location, fiber type, and site conditions. This data is based on cost information collected during the National Telecommunications and Information Administration's (NTIA) recent broadband infrastructure grant program¹ as well as research on current market prices. Aerial Fiber Deployment, and Microwave Deployment. Costs associated with these. The cost of fibre splicing is significantly influenced by the equipment and tools needed for the process. These devices ensure minimal signal loss and are a worthwhile investment for. I usually bill T&M, but it works out to about \$175-250 for setup/teardown per site and \$4-7 per fiber for prep in a new tray in an existing case and splicing depending on if it's flooded or dry cable. The "per splice" rate is the most. With one provider both the installation cost and the monthly fee (leased aerial run) went up by 40% when I went from 4 strands to 12. From \$5000 to \$7000 for installation.
