

# How much does underground fiber optic cable conduit cost

## AI Overview

Underground fiber optic cable conduit installation typically costs between \$10 and \$50 per linear foot, depending on terrain, method, and project complexity.

### Cost Breakdown

**Cable and Conduit Materials:** Armored fiber optic cables for direct burial cost around \$6–14 per foot, while HDPE conduits add \$2–4 per foot, with higher-quality conduits costing slightly more . For example, a 12-strand single-mode cable may cost about \$0.70 per foot, and a 1.25" HDPE conduit about \$1 per foot .

**Trenching and Excavation:** Excavation is the largest cost component. Traditional trenching can range from \$7–50 per foot depending on soil conditions, with directional boring costing \$800–1,500 per day for equipment rental . Micro-trenching or plowing may reduce costs in urban or rural areas, respectively .

**Labor and Installation:** Labor costs vary with route complexity, soil type, and access. Urban areas often require certified flaggers, traffic control, and safety measures, adding \$1–10 per foot . Installation labor for straightforward rural projects may be lower.

**Additional Infrastructure:** Handholes and access vaults cost \$200–800 each, while Fiber Distribution Units (FDUs) are around \$100 each . Equipment closets and termination enclosures add to the total project cost.

**Permits and Miscellaneous Costs:** Permits, restoration, and safety compliance can further increase costs, especially in urban environments .
