

How to connect the audio fiber optic cable

Overview

1 Turn off the power to the audio amplifier or receiver, and the source component. 3 Insert the connector on one end of the fiber-optic. Before you can start running fiber optic audio cables, you will need the following equipment: Fiber Optic Audio Cable: This is the main component of your setup. Look for a high-quality fiber optic audio cable that meets your specific requirements in terms of length, connector type, and audio format. To use a fiber optic audio cable, you'll need to connect it between compatible audio devices to transmit sound digitally. However, for those new to this technology, inserting an optical cable correctly can be a daunting task. They are commonly used to connect devices such as televisions, gaming consoles, Blu-ray players, and soundbars to an audio receiver or amplifier.
