

How to identify a three-level distribution box on site

Overview

Primary Distribution Box: Serves as the main distribution box for a construction site or project (usually only one). The following is a detailed introduction about it: - **First-level Distribution. Electrical equipment is installed under the switch box, forming a three-level distribution. In addition to installing leakage protectors in the final switch box, a first level leakage protector should also be installed. YoAhorroEnergia Data Infrastructure (YAE) delivers modular data centers, edge data centers, server rack systems, cold/hot aisle containment, EMS, smart PDU, and AC/DC distribution solutions for Africa and Europe. As well as purely technical factors (intensity, number of outputs, etc.
