

How to ping continuously on the core switch

Overview

To initiate a continuous ping, you need to use the ping command with specific parameters. The most basic form involves adding the -t switch followed by the target IP address or domain name. This article will help network administrators with some handy tips on using PING feature set in Cisco, Juniper, Windows and MAC devices. Unlike a standard ping, which sends a set number of packets, continuous ping keeps sending packets. Constantly pinging an IP address is a common network troubleshooting technique used by IT professionals and cybersecurity experts to monitor the availability and responsiveness of a device or server. 3 with a repeat a count of 500. 3 repeat 500 but keep getting the error % Invalid input detected at '^' marker. Step 1: Open Command Prompt Press Win + R, type cmd, and press Enter to open the Command Prompt.
