

How to quickly cut fiber optic cables short

AI Overview

Cutting fiber optic cables requires precision and the right tools, including fiber optic cutters, strippers, and cleavers, while following strict safety precautions.

Tools Needed

- Fiber optic cable cutter: Specialized for cleanly cutting the outer jacket and fiber layers .
- Fiber optic stripper: Removes the protective coating without damaging the glass fiber .
- Fiber optic cleaver: Provides a precision cut for the fiber itself .
- Scissors or utility knife: For cutting the outer jacket and Kevlar fibers .
- Fine-grit sandpaper: Optional, to smooth rough ends after cutting .
- Protective gear: Safety glasses and gloves to prevent injury from glass shards .

Step-by-Step Quick Method

- Mark the cut location: Use a marker or tape to identify where the cable will be cut .
- Score and cut the outer jacket: Use a fiber optic cutter or sharp utility knife to score the jacket, then carefully cut through it .
- Handle Kevlar fibers: Twist protruding Kevlar fibers into a rope-like strand and snip with metal scissors .
