

How to remove paint from cable trays

Overview

Dried paint can be removed from metal by one of three processes: chemical, heat, or sanding. Sanding is a quick and easy solution, but if you're working with a small or delicate piece, try the next options. Proper cable tray cleaning is essential to ensure the safety, efficiency, and longevity of your cable tray system. This. This guide will walk you through the process of removing paint from different surfaces, from hard materials like metal and concrete to delicate fabrics and leather. This treatment comes in two main types: Hot-dip galvanization involves immersing the cable tray in molten zinc, creating a robust zinc-iron alloy coating. The data panel in my house had an ungodly amount of texture/paint blasted into it. Any advice on how to remove this gunk from the wiring?

I'll also add some pictures after I've completed the job.
