

Huawei CGHF Optical Module

Overview

The H901CGHF board is an 16-port XG-PON and GPON Combo OLT interface board for Huawei SmartAX MA5800 series OLT including the MA5800-X17, MA5800-X15, MA5800-X7, and MA5800-X2. It works together with the optical network unit (ONU) to provide XG-PON and GPON access services. In the AI era, Huawei provides a full range of GE to 800GE optical modules, featuring three major capabilities: Spanning (ultra-long transmission), Stable (ultra-high reliability), and Secure (ultra-solid security). Great for 10G GPON. ZISA Product project Custom is customized service provided by ZISA to meet customers' hardware and software development needs, including product compatibility, software feature development and customers brand design. split ratio of CGHF service card?

A: MAX. 244 Gbit/s XG-PON channel: Tx: 9.

This document provides technical details about 1Gbps eSFP Optical Modules, including specifications and support information.

Types of Optical Modules

Multimode optical modules are used with multimode fibers. Multimode fibers have lower transmission performance than single-mode fibers because of modal dispersion, but their costs are also lower.
