

In-stock standalone switches NRZ

AI Overview

Standalone NRZ-capable network switches are available in various port counts, including 8, 16, and 24 ports, with options for unmanaged, PoE, and industrial-grade models.

Available Options

1. Unmanaged Standalone Switches Unmanaged switches provide plug-and-play connectivity without complex configuration, ideal for small to medium networks. They are available in 8, 16, and 24 port configurations, often with Gigabit speeds and optional PoE support. These switches are suitable for home, office, or industrial environments where simplicity and reliability are key. Many models feature rugged metal housings, extended temperature ranges, and DIN rail or wall mounting for industrial applications (Spectra) . 2. Industrial Network Switches Industrial switches are designed for harsh environments, with extended temperature ranges (-40°C to +80°C), shock and vibration resistance, and EMI protection. They support 4-24 LAN ports and optional 1-24 SFP ports for flexible Ethernet configurations. Some models include PoE functionality for powering devices like IP cameras or access points. Mounting options include DIN rail, rack, desktop, magnetic, or wall (Spectra) . 3. Retail and Online Suppliers

- DigiKey offers a large in-stock selection of switches and hubs, including standalone models with same-day shipping (DigiKey) .
- PCNation provides competitively priced brand-name standalone switches with fast delivery and professional consultation (PCNation) .
- Newegg lists managed, unmanaged, PoE, and 10GbE switches, suitable for home, gaming, or enterprise networks (Newegg) .
