

Indonesia Connector Box 8 Cores

AI Overview

An 8-core ODP (Optical Distribution Point) box in Indonesia is a fiber optic termination and distribution solution capable of serving up to 8 clients from a single feeder line.

Overview

The 8-core ODP box is designed for FTTx networks to terminate and distribute fiber optic cables. It integrates fiber splicing, splitting, distribution, storage, and cable connection in a single protective enclosure, making it suitable for both residential and commercial deployments. The box is commonly used in Indonesia for FTTH (Fiber to the Home) applications, allowing one central fiber to serve up to 8 clients.

Key Features

- Capacity: Supports up to 8 fiber cores, with optional splitters (1:8) for dividing signals to multiple clients.
- Material: Made from durable ABS plastic, ensuring a lightweight yet strong structure.
- Protection: Outdoor models feature IP65/IP66 waterproof ratings, protecting against dust and rain.
- Design: Double-layer layout for efficient fiber management:
 - Lower layer for splitters and excess fiber storage
 - Upper layer for splicing, cross-connecting, and distribution
- Installation: Wall-mountable or pole-mountable with included kits; adapter slots allow easy installation without screws.
