

# Level 3 power distribution box with industrial socket

## AI Overview

A Level 3 industrial power distribution box integrates multiple high-capacity sockets, circuit protection, and durable enclosures for safe and reliable power distribution in demanding industrial environments.

### Overview

A Level 3 power distribution box is designed for high-power industrial applications, providing centralized control and multiple socket interfaces for various equipment. These boxes typically support AC voltages up to 660V and frequencies of 50-60Hz, accommodating both single-phase and three-phase systems. They are widely used in industries such as manufacturing, chemical, metallurgy, power plants, coal mines, and construction sites.

### Key Features

- **Industrial Sockets:** Equipped with CEE standard sockets, including 3-pin, 4-pin, and 5-pin configurations, with current ratings from 16A to 125A depending on the application. Some boxes include both two-core (220-250V) and five-core (380-415V) sockets for versatile equipment connections.
- **Circuit Protection:** Integrated MCBs, RCCBs, and surge protection devices safeguard against overloads, short circuits, and leakage currents, ensuring worker and equipment safety.
