

Mauritania Light-Emitting Cable Branch

AI Overview

Mauritania has landed a new 670 km subsea branch of the EllaLink cable in Nouadhibou, providing high-capacity, low-latency connectivity to Europe and enhancing national digital resilience.

Overview

The new Mauritania branch of the EllaLink submarine cable extends over 670 kilometers from the main EllaLink trunk to a newly constructed cable landing station in Nouadhibou, the country's second-largest city . This branch gives Mauritania a second direct international connection, complementing the existing Africa Coast to Europe (ACE) cable that lands in Nouakchott, and provides route diversity to improve network resilience and digital sovereignty .

Technical Specifications

- Fibre pairs: 2
- Capacity: Multi-gigabit from launch, scalable to multi-terabit
- Technology: State-of-the-art optical systems, including ROADM WSS branching units
- Latency: Low-latency direct path to European cloud, AI, and data services
- Operator: EllaLink, responsible for operation and maintenance The infrastructure is designed to accommodate decades of traffic growth, supporting both public and private sector digital services .
