

# Mexico Chili Bridge

## Overview

One of the first double span cable stayed bridges ever built, the Puente Mezcala consists of three tall towers that support two uneven spans of 1,020 feet (311 mtrs) and 984 feet (300 mtrs). The central tower of Mezcala is notable for being the tallest bridge structure in North. The Mezcala Bridge (also known as the Mezcala-Solidaridad Bridge), is a cable-stayed bridge located in the state of Guerrero on Highway 95D in Mexico. It's part of Highway 95D and crosses the Balsas River, which is also called the Mezcala River. This amazing bridge is 891 m (2,923 ft) long and has six different-sized sections. Construction of the bridge began in 2002 and finished fourteen months later, voted the best infrastructure project in Mexico in 2004.
