

Nepal fiber optic hybrid cable 2 cores

AI Overview

2-core hybrid fiber optic cables in Nepal combine fiber data transmission with power delivery, suitable for FTTH, CCTV, and telecom applications.

Overview

A 2-core hybrid fiber optic cable integrates single-mode fiber cores with electrical conductors, allowing simultaneous data and power transmission in a single cable. This design reduces installation complexity, saves space, and minimizes potential errors during deployment. These cables are commonly used for radio elements, outdoor networking, CCTV systems, and FTTH installations.

Key Features

- **Fiber Type:** Typically single-mode G657A2, optimized for low bending loss and long-distance transmission.
- **Power Integration:** Includes 48V DC conductors for powering devices directly through the cable.
- **Connectors:** Ruggedized duplex LC connectors on fiber ends, with armored or flexible tails for easy polarity management.
- **Jacket and Protection:** PE black jacket, UV-protected, and riser-rated for indoor/outdoor use.
- **Lengths:** Available in multiple lengths, commonly starting from 3 meters (9.8 feet) and customizable for larger installations.
